Your work health and safety partner

## WHS ADELAIDE - QUARTERLY UPDATE

### WE'RE IN THE CBD!

[Stratton Safety](#) is based in the Adelaide CBD as of 9 April 2018 at **Level 3, 97 Pirie Street**.

We're just an email or phone call away!

**Mob: 0405 321 874**

**Email: [admin@strattonssafety.com.au](mailto:admin@strattonssafety.com.au)**

### ISO 45001: NEXT STEPS?

The final draft of "*ISO 45001: Occupational health and safety management systems- Requirements with guidance for use*" has been ratified.

What does this mean for standards compliant companies?

[Read more below](#)

### WHEN "IT" HITS THE FAN

What is your plan in the event of a significant incident or a breach of a duty of care under the WHS legislation?

How do you engage staff in improving health and safety systems without increasing legal exposure?

[Read more on Page 2](#)

### ISO 45001: WHAT'S DIFFERENT?

Transitioning from AS/NZ 4801 to ISO 45001 should be manageable for standards compliant organisations. ISO 45001 is closely aligned to modern Australian WHS law, recognising "top management" roles, "shared duties" and the nature of consultation.

There are differences that may impact on WHS management systems ... [\(Continued on Page 2\)](#)

## We're in the Adelaide CBD

Integrating health and safety with business systems contributes to sustainable productivity and meaningful work.

Let us help with legislative compliance, effective management systems and establishing mechanisms for improvement and development.

When challenges arise, we conduct WHS investigations and implement effective responses to Regulator improvement and prohibition notices.

### ISO 45001: WHAT'S DIFFERENT? (From Page 1)

For example, ISO 45001;

- Has a much greater emphasis on working systematically
- Emphasises integration of management systems
- Recognises multi-employer workplaces, requiring proactive coordination
- Describes the Hierarchy of Controls differently to the national model WHS legislation
- Supports a more context-dependent interpretation of “continual improvement”

Contact [Stratton Safety](#) to initiate an introduction to ISO 45001 for your management team

## WHEN “IT” HITS THE FAN

Work place injury and significant near-misses are all too common. So too are worker complaints about co-worker or management conduct. Business owners and executives are exposed to individual prosecution if management systems provide inadequate protection to workers. **Contact us for more information.**

### Control your risk

Monitor and test management systems for effectiveness

Seek preventative advice from the Regulator (i.e. SafeWork SA)

Manage incidents and injured worker(s) to minimise further harm

Report to Regulator if incidents are “notifiable”

Contact a legal services provider with WHS expertise to conduct an internal and privileged investigation

Implement relevant corrective actions from internal and external investigations
